PROFESSIONAL SUMMARY

Full Stack Java Developer with **3+ years** of experience building scalable **web and mobile applications** using **Java 8+, Spring Boot, REST APIs, and Microservices**. Proven track record delivering **high-scale, production-grade systems handling millions of records**, with expertise in **SQL/NoSQL databases**, **Agile development**, and **CI/CD pipelines**. Hands-on with **AWS, Docker, and Redis caching**.

TECHNICAL SKILLS

Backend Skills :	Java 8/17, OOPs, Collection Framework, Multithreading, Design Patterns, SOLID, DSA
Spring Ecosystem :	Spring Boot, Microservices, REST API, JPA/Hibernate, Spring Security, JWT, OAuth2.0, Kafka, Docker, AWS, SAP Hybris
Frontend Skills :	Angular, React, Ionic, Rxjs, HTML5, CSS3, JavaScript, TypeScript, SAP Spartacus
Database & Caching :	MySQL, PostgreSQL, MongoDB, Redis, H2
Tools :	Git, GitHub, Copilot, Jira, Maven, Swagger, JUnit/Mockito, Postman, Claude Code

EXPERIENCE

Aurionpro Solutions Dec 2024 – Dec 2025
Software Engineer
- Engineered backend services in **Java, Spring Boot, and PostgreSQL** supporting **4+ crore** farmer subsidy records.
- Integrated **DDO Portal and PFMS** for processing large-scale subsidy payments worth crores to farmers.
- Improved system performance through **Redis caching and PostgreSQL query optimization** under production load.
- Resolved production issues onsite with government officials, reducing escalation turnaround during rollouts.

Clavrit Digital Solution May 2022 – May 2024
Software Engineer
- Built full-stack enterprise applications using **Spring Boot, Angular, and MySQL** for business use cases.
- Architected **reusable REST APIs** and refined database structures, improving scalability across multiple modules.
- Contributed to Agile sprints building **AI-driven tools** and **SAP Hybris**-based e-commerce solutions.
- Built cross-platform mobile features—**GPS, camera, social login**—using **Ionic** across iOS and Android.

PROJECTS

Agri Darshan Dec 2024 – Dec 2025
Java Developer
- Integrated **POS devices with biometric authentication** to verify farmers and distribute seeds and fertilizer.
- Designed a **lottery-based allocation workflow** to fairly select winners when demand exceeded district-wise targets.
- Built **CM Dashboard APIs** providing real-time visibility into scheme-wise farmer benefit distribution transparency.
- Wrote **PostgreSQL functions** and applied **Redis caching** to support subsidy workflows and homepage performance.

MotoCatch Sep 2023 – Apr 2024
Frontend Developer
- Build features enabling police officers to **capture and upload traffic violation images and videos** using smartphones.
- Integrated **REST APIs** for AI-powered traffic violation detection and displaying vehicle and license plate details.
- Implemented **camera and video capture** functionality using Ionic, Angular, Capacitor, and native plugins.
- Integrated **GPS-based location capture** to associate traffic violation evidence with geographic coordinates.
- Developed frontend workflows to display **AI detection results** for officer review before challan processing.

Estimation Tool Jan 2023 – Jul 2023
Full Stack Developer
- Integrated **JIRA API** to power **AI-based task time estimation** and project analytics insights.
- Developed **RESTful services on AWS** handling user workflows, task lifecycle, validation, and logging.
- Developed dashboard features that helped teams review task estimates and project progress in one place.
- Collaborated with AI and frontend teams to deploy scalable, reliable dashboards on **AWS infrastructure**.

EDUCATION

JS Institute of Technology, Firozabad *2021-2024*
B.Tech. in Computer Science Engineering Percentage: **75%**

Government Polytechnic Ghaziabad *2018-2021*
Diploma in Information Technology Percentage: **71%**
